Easily conduct performance-based student assessment

Features

SUNBURST. Learner Profile 3.0 is designed to help educators manage student learning. This comprehensive assessment tool allows teachers to import, create, and organize specific learning criteria to assess individuals or groups of students. These criteria, as well as anecdotal information, can be weighted, quantified, and entered into a full-featured, integrated *GradeBook*. Teachers manage grades, attendance, and criteria from one central location.

Learner Profile 3.0 helps teachers stay focused on meeting teaching objectives and helps them integrate numerous administrative, planning, and reporting functions. A robust Network Version fosters collaboration and improves accountability and communication with schools and districts.

Learner Profile 3.0 is mobile, flexible, and powerful, with features that allow teachers to:

- Easily set up and import student records
- View data and produce a variety of reports, including standardized report cards, with all student data
- Balance traditional measures, such as homework, tests, and quizzes with observable data in grading
- Support numerical, letter grade, informal, or a mixed array of qualifiers
- Meet the demands of state IEP and national standards

Teachers can capture assessment information as they interact with students with the companion program *Learner Profile To Go 3.0* installed on a PDA. Used in conjunction with **Learner Profile 3.0**, teachers and administrators have powerful management and assessment tools. Observable information can be uploaded to a teacher's desktop computer to be weighted, quantified, and entered into the *GradeBook*.

Prices

Mac/Win CD9639DH
Single	\$399.95
Lab Pack of 5	\$999.95

1 PLAN!

On your desktop, create learning indicators for individuals or groups. Download plans to your PDA.

2 OBSERVE!

Using your PDA, actively record students' performance data. Easily take attendance. Keep a homework report and monitor behavior information.

3 REPORT!

Learner Profile 3.0 automatically manages data and students' records. Effortlessly provide reports of students' progress to parents, teachers, department heads, and administrators.
