SUNBURST Learner Profile 3.0 is designed to help educators manage standards-based student learning. This comprehensive assessment tool, which contains a full-featured, integrated GradeBook, allows teacher to import, create, and organize specific learning criteria to assess individuals or groups of students. This criteria, as well as anecdotal information, can be weighted, quantified, and entered into the GradeBook. Teachers manage grades, attendance, and standards-based criteria from one central location.

Learner Profile 3.0 helps teachers stay focused on their teaching objectives and help integrate their numerous administrative, planning, and reporting functions. A robust Network Version fosters collaboration and improves accountability and communication with schools and districts.

Learner Profile 3.0 is mobile, flexible, and powerful, with features that allow teachers to:

- Easily set up and import student records
- Freely navigate using an supported and intuitive interface
- Track assignments, take attendance, and calculate grades
- View data and produce a variety of reports, including standardized report cards, with all student data
- Balance traditional measures, such as homework, tests, and quizzes with observable data in grading
- Support numerical, letter grade, informal or a mixed array of qualifiers
- Meet the demands of IEPs, and state and national standards
